

***'Sustainable Water Company of the Year' ~ USA Prestige Awards***

Creating The World's Purest Drinking Water, Out of Thin Air

“At Altitude Water, our team is focused on creating a safer and cleaner future for all.” “Water is one resource we can’t do without, and it’s essential that people have access to the safest water possible.”

[AltdWaterUSA.com](https://AltdWaterUSA.com)

Made in the USA

**Jeffrey Szur**, Founder and CEO of [Altitude Water](#), has been on a nearly two-decade-long mission to tackle one of the world's most pressing issues: water scarcity. In a world where over 4 billion people face water shortages, Jeffrey has brought forth a solution that extracts water from thin air. His company, headquartered in Lauderdale Lakes, FL, is redefining water access through its line of Atmospheric Water Generators (AWGs) and its innovative Disaster Relief Trailer, offering life-saving hydration in crisis situations worldwide.

Since 2019, [Altitude Water](#) Company has been at the forefront of the water independence movement, leveraging over a decade of expertise from core executive and production teams, who have been innovating in air-to-water technology since 2007. The groundbreaking patented Atmospheric Water Generator (AWG) technology transforms ambient air into clean, drinkable water, empowering homes, businesses, and communities to generate their water supply.

Proudly manufactured in Lauderdale Lakes, Florida, machines support local American jobs and guarantee exceptional quality and craftsmanship. AWGs are trusted by the U.S. military, disaster relief teams, and various nonprofits, delivering sustainable clean water solutions to communities around the globe.

\*

[Altitude Water](#) owns **Utility Process Patent 7,272,947**, making us the only AWG company on the market legally providing the Ozone Technology curating the purest and freshest drinking water during and post-production.

THE TRAILBLAZERS. THE LEADERS.  
THE CHANGE-MAKERS. THE DREAMERS.

Hi Res Images Available Upon Request

Jeff Szur, Founder & CEO, Altitude Water - widely respected for his vast knowledge and skill in creating pure water in which he has decades of experience. Jeff has been an expert source for media in many areas involved pure drinking water, a speaker and panel member for numerous water trade shows, expos, conferences all over the world for over 15 years. Jeff has also done various academic programs in schools throughout the United States. One robotics club won the most innovative award through Jeff's tutelage.

\* \* \*

Altitude Water, located in Lauderdale Lakes, Florida, is a leading manufacturer and installer of several types of Atmospheric Water Generators (AWG's) from residential and light commercial machines to heavy duty military-grade machines that produce water anytime, anywhere. The company's Founder and Chief Operations Officer, Jeff Szur's career in the AWG sector began in 2007. In 2009 he developed the first ozone purification machine in Trinidad before bringing the production ready machines to manufacture in Florida to create jobs in the USA and ensure reliability.

With decades of experience in the atmospheric water generator (AWG) industry, Jeff's innovative approach has made significant impacts across the globe. He has created a one-of-a-kind Disaster Relief Trailer for use during disasters for hurricane season (which is capable of providing pure drinking water, solar power energy, cell service, and internet service to in-need communities) as well as has supplied clean water to communities in Cameroon, Maui, Colombia, and Costa Rica and in over 70 countries around the world. The sun never sets on an AWG manufactured by Szur and his team.

Szur's work has been recognized by numerous other organizations committed to environmental sustainability and disaster relief, including: The Weather Channel, Australia's Ticker News, Energies Magazine, Authority Magazine, VoyageTampa, NewsPronto, Getting Ecological, Savoir Faire Magazine, Environmental Directions with Nancy Pearlman, and the US Marines. Additionally, Jeff has appeared on multiple podcasts to discuss his work, including Your Life. Your Legacy., Life by the Page, Not Quite After Midnight (which also received a sequel), The Covert Code, the Jiggy Jag show (x2), Savoir Faire Magazine's Podcast, Had to Be There, NatureBacked, The Michael Brian Show, and GreenTech Pulse among others. He has also spoken as a speaker and panelist at numerous international trade shows, such as the Disasters Expo USA 2024.

In 2024, Altitude Water's Disaster Relief Trailer aided relief efforts following Hurricane Helene, providing water, electricity, and wi-fi to those impacted across Florida and North Carolina. Jeff Szur was also honored during the 2024 Forbes Best of Africa Award Ceremony for his company's 'Water to Africa' initiative as well as was a speaker at the Sustainability Summit held during the UN Climate Week in 2024. Altitude Water's Trident-12 AWG was featured in Food & Beverage Magazine's prestigious list of Top Fall Products. In 2025, Szur will be featured on the cover of Top 100 Magazine as well as listed among the Top 100 Innovators and CEOs. He will also be featured in the season premiere of the Fish Guyz Lures to Legends.

[ALTITUDE WATER AND NEW USE ENERGY SOLUTIONS PARTNER TO PROVIDE INTEGRATED SUSTAINABLE ELECTRICITY AND CLEAN DRINKING WATER GENERATION SYSTEMS ANYWHERE, ANYTIME](#)

[As Water Quality Diminishes Globally, Altitude Water's Solution Called Atmospheric Water Generators Is Trending](#)

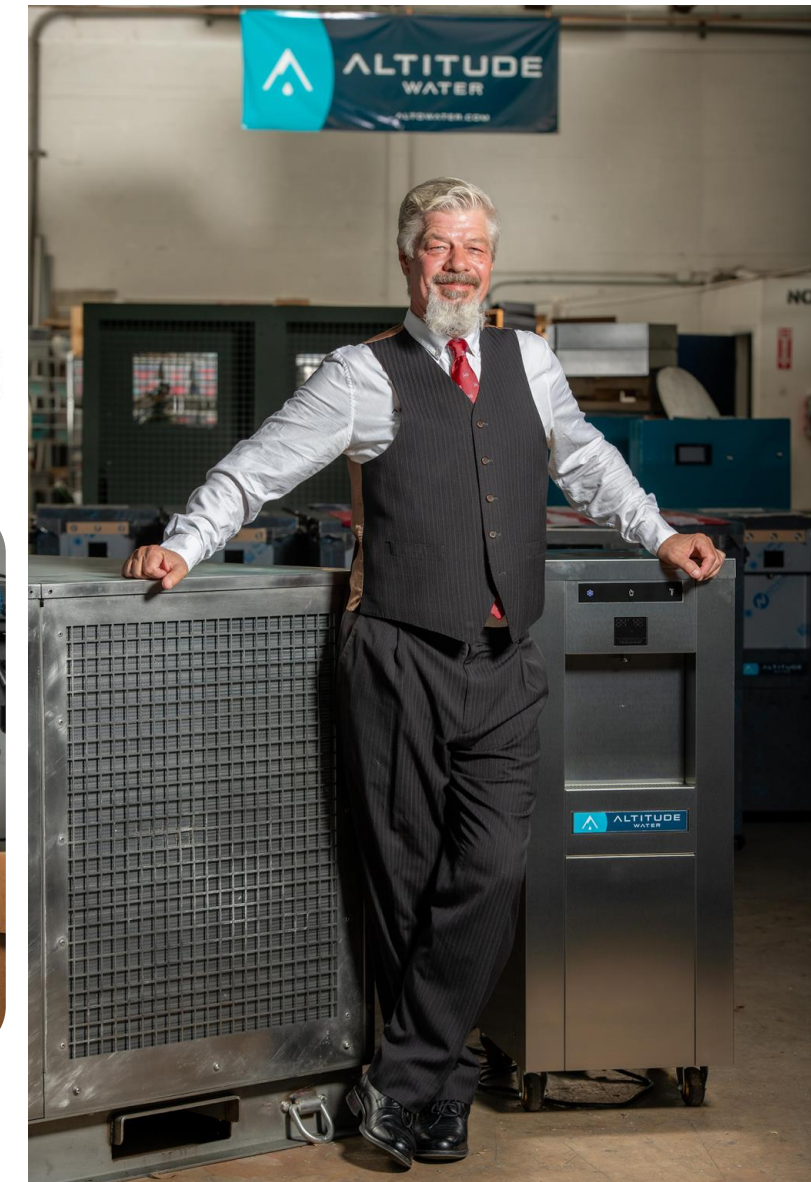

**Jeff Szur** guest topics/educating:

- [water safety](#), water contamination
- health problems caused by dirty water or dehydration
- The role water and hydration play in skin health and sexual health
- impact of PFAS and 'forever chemicals' as well as, Microplastics, Nanoplastics
- the state of the AWG sector as well as its role in mitigating these problems
- the purest drinking water from Atmospheric Water Generators (AWGs)
- water directly from the humidity in the air and purify, remineralize, and alkalize it for consumption
- Purifies 1,500 gallons a day of contaminated municipal water or groundwater. It has three sources to charge the 60 kWh of battery storage- solar panels, gas generator (on the trailer), or plug in to the grid.
- the United States Armed Forces drinking water source for domestic and deployment-the U.S .Military has purchased 40 Trident 12 units, 4 Trident 200 units, and 2 Trident 100 units
- production takes place 100% in the United States
- first-of-its-kind Disaster Relief Trailer that can produce 210 gallons of purified water daily, is enabled with Starlink internet that can provide Wi-Fi for up to 100 people within a 0.5 mile radius, is built with solar panels that generate 12 kWh, with 5.6 kWh for operations and 6.4 kWh for battery storage, as well as a gas generator for power backup
- provided aid to Cameroon, Colombia, Maui, Florida, North Carolina, and more
- Altitude's non-profit partners include: Aquavera, Jean Felicien Gacha Foundation, and L’Oreal Women Sustainability Fund, Footprint Project, Compassion International, World Vision, Grassroots Aid Partnership, Noah’s Arc, Amy Grant, and Vince Gill, Barefoot Republic Camp and Healing Hands of Hope.
- Altitude provides residential, commercial, disaster relief, and (soon) bottled water

Always Active...

What if clean energy and clean water aren't separate problems, but two sides of the same solution? In this episode of The Solar Coaster, I sit down with Jeff Szur—founder of Altitude Water—who's pioneering atmospheric water generation technology that literally creates water from air using solar power. Jeff reveals how 20% of California's electricity is used just to move water around the state, why the fire in Maui became an unexpected disaster relief success story, and how his company is solving water scarcity in the most remote locations on Earth.

South Florida's International Polo Tour Kicks Cancer Charity-Supporting Celebration where Altitude Water was prominently accessible both indoor and outdoor for guest to enjoy!

The FiiXX Foundation was founded on faith-driven principles, with our mission being to educate about the importance of giving back locally and abroad while honoring those who serve, uplift the vulnerable, and foster innovation. "The opportunity to give a LIVE demonstration of our breakthrough disaster relief technology, as well as sample purified water produced by the machinery, was true honor." ~ Jeff Szur

DO WELL & DO GOOD

Altitude Water collaborates with distributors, churches, [nonprofit organizations](#), non-governmental organizations and humanitarian organizations who share its values. The partners give big projects that can be completed and create opportunities to engage with clients and regions worldwide. Altitude Water is dedicated to establishing win-win-win situations for the individuals served.

water generation is meeting communities in need. And Andria Tudson of Peninsular makes a compelling case for biodegradable synthetic fibers as a real alternative to petroleum microplastics.

Alissa Auburger of Baker McKenzie is candid about how fast the regulatory landscape is shifting. Companies that treat compliance as a threat rather than a ally will be the ones that lead. We also hear from NESI on building climate resilience in urban supply chains, and from S&B to the Bahamas on aquaculture, container farming, and coral restoration on the future of food security for island nations.

Sustainability isn't a distant goal, it's a daily practice. Hope this issue reminds you of that, and offers something useful to take back to your own work.

Toby Matthews, Founder, Sustainable Business Magazine

ALTITUDE WATER

# ATMOSPHERIC WATER GENERATION WITH ALTITUDE WATER

The Sustainable Business Magazine speaks to Jeff Szur, Founder and COO of Altitude Water about his innovative atmospheric water generation technology. *Written by Jennifer Withers*

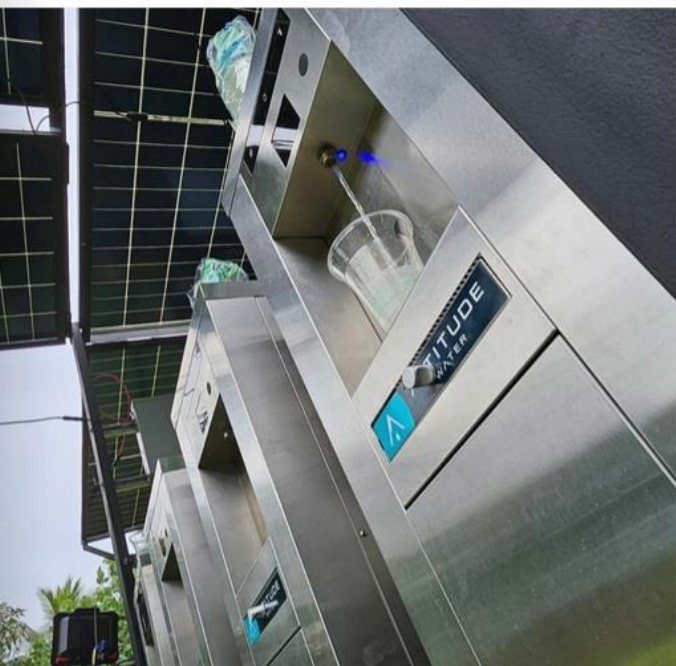

44 | SUSTAINABLE BUSINESS

Altitude Water is the Prestige Awards 2024 Sustainable Water Company of the Year. Jeff Szur originally developed his ozone purification technology in Trinidad in 2009 before bringing his knowledge to US markets. His atmospheric water generation technology provides clean drinking water to villages where this resource is not available. Altitude Water has also deployed the technology as disaster relief for survivors of Hurricane Helene and the 2023 Maui wildfires.

**ATMOSPHERIC WATER GENERATION** Jeff Szur started Altitude Water on the belief that water is the next oil, an infinitely precious but finite resource. His technology utilizes a previously untapped aquifer, the Earth's atmosphere. Atmospheric water generation reverses the process of evaporation, condensing water from its gas form into its liquid form. The machines use ozone purification to clear any contaminants and

circulate the water every twenty minutes to prevent biofilm growth. Jeff Szur designed his technology to mirror Mother Nature, including the use of ozone, which he describes as a powerful natural purifier. Most drinking water is slightly acidic to reduce pipe corrosion and ensure safety. Altitude Water boasts mineralization over ionization to increase pH to 8.1, again reflecting natural processes that occur in the environment.

Altitude Water sells different sizes of atmospheric water generators, including 15 gallon alternatives to traditional water dispensers and much larger commercial generators. The T-100 delivers up to 185 gallons of purified water, and is aimed at residential complexes, hospitals and schools. The T-200 produces up to 360 gallons and suits military installations, farms, and commercial enterprises. Jeff describes the incredible growth his company is experiencing. "We're really pleased with where we are at. We had

our best year in 2025, and we're looking for an even a better year in 2026. As a matter of fact, looking at projections, we may surpass 2025 numbers by the end of the first quarter beginning of the second quarter of 2026. So, it's exciting, and it's nice to be working with our supply chain. Being a made in the USA product where we can source right from our shores is a huge advantage to us."

**NON-PROFIT COLLABORATION** Altitude Water collaborated with non-profit organization Aquavera and the Jean-Felicien Cacha Foundation to provide clean

drinking water to the community of Maka, Cameroon. Prior to the Altitude Water hub Maka experienced an average of 6 deaths a year as a result of contaminated drinking water. Today atmospheric water generation produces 1000 litres of clean drinking water daily within the village, eliminating the 4.25km journey to collect river water. The solar panels that power the generators also provide an electricity source for internet and online classes. Jeff explains that the machines are self-replenishing and require minimal maintenance. The hub also provides ozone purified rainwater capture and well water purification for sanitary

purposes, solar panel cleaning and water for dishes.

Since the hub became operational 17 months ago, Maka hasn't seen a single water related death nor a single hospital visit for a water related illness. Jeff describes the initiative: "Aquavera raised funds through L'Oréal Woman's Sustainability Fund and a couple of family offices, and we built a water hub, but not only a water hub, an educational one as well. We're not just trying to provide water in an area of need, but we're trying to break generational curses. So if the women now have 5 hours a day that's given back to them when they

44 | SUSTAINABLE BUSINESS

don't have to get water, what are we going to do with that time? Through Jean Felicien Cacha and their educational programs, we now teach them beading, sewing and basket weaving, so they can have a skill and add to the income of the family."

**DISASTER RELIEF INITIATIVES** Jeff developed the Altitude Water Disaster Relief trailer to deliver essential resources to emergency locations as quickly as possible. Jeff discovered that bottled water takes up 70% of Red Cross warehouse space in aid situations. On the other hand, atmospheric water generation produces water on site, thereby increasing accessibility and reducing the carbon footprint of resource delivery. During the 2023 Maui Wildfires Jeff worked with the Noah's Ark Foundation, whose founders were vacationing on the island at the time, to deliver two disaster relief trailers. Jeff says: "These trailers are still operating in Maui. One is at a homeless shelter in Lahaina, and the other is for the recovery workers, providing them water before they go out to do their work."

Altitude Water expanded on the Maui Wildfires Initiative with the design of their solar powered disaster relief trailer. This trailer combines water generation with electricity provision and Starlink internet connectivity. During Hurricane Helene, Altitude Water collaborated with non-profit Footprint Project to deliver 400 gallons of water to Perry, Florida where the hurricane initially hit the US. Altitude Water then tracked the hurricane north, arriving in Asheville, North Carolina where they collaborated with non-profit Grassroots. Jeff explains: "The problem was they didn't have water, and they didn't have electricity. So in comes the Altitude Water Disaster Relief Trailer. We coupled their food trucks with our trailer at the first day, we were making 600 meals a day for those in need."

**PROVIDING WATER INDEPENDENCE** Jeff explains that bottled water is the number one beverage sold in the world. "The conglomerates did a beautiful marketing job. They educated the public to

let them know how bad our tap water is and what's happened to it. They just failed to let us know that they're taking that same tap water, filtering a little bit, and putting it in a terrible plastic bottle that's adding micro-plastics now to the list. Their solution was highly profitable for themselves, and very damaging to our planet and our bodies." Altitude Water eliminates the use of plastic, and delivers clean, highly oxygenated water independent of the companies and government bodies that manage our aquifers.

Jeff has plenty of projects in the pipeline for 2026. One such plan is to expand production of the ozone purification boxes, including a smaller model for RVs and boats. These filters enable utilization of alternative water sources in locations where low humidity limits atmospheric water generation. Excitingly, Altitude Water has partnered with RM Design Pro to deliver the first US built yacht that generates its own drinking water from

*"The conglomerates did a beautiful marketing job. They educated the public to let them know how bad our tap water is and what's happened to it. They just failed to let us know that they're taking that same tap water, filtering a little bit, and putting it in a terrible plastic bottle that's adding micro-plastics now to the list."*

the atmosphere. Jeff is also keen to expand his partnerships in the disaster relief sector, and continue collaborating with non-profits such as Samaritan's Purse to provide resources for those in need.

**EDUCATION AND AWARENESS** Our conversation ends on a note about the importance of being aware of the options available when it comes to water

provision. Jeff wants to raise public awareness of Altitude Water. "We just did a poll on social media where we asked, have you ever heard of atmospheric water generators before? And amazingly, 70% of the people that responded had never heard of atmospheric water generation. So, we want to educate the public on the ability to create your own water and to be your own water utility."

## SUSTAINABLE WATER COMPANY OF THE YEAR

Altitude Water

Altitude Water's sector-leading atmospheric water generators (AWGs) transform humidity into clean, dependable drinking water. Delivering self-sufficiency for homes, businesses, schools and communities, the company converts air into clean, reliable drinking water, eliminating reliance on pipes, wells, or traditional infrastructure. Since 2019, it has accelerated leadership in atmospheric water generation, refining systems trusted by the US Military, emergency and disaster response teams, humanitarian organisations, schools, and businesses worldwide. Through decentralised water production, Altitude Water strengthens human resilience, economic stability and national security.

The judges admired Altitude Water's revolutionary technology that bypasses contamination, environmental runoff and infrastructure challenges of traditional water supplies. Using natural condensation, each unit captures atmospheric humidity, including clouds and fog moisture, and converts it into potable water. The system channels this moisture through multi-stage purification, including ozone treatment and carbon filtering, to keep it pure. The result is clean, distilled water that can be mineralised to meet drinking water standards – without relying on groundwater, surface water, or municipal infrastructure. From air intake to the final pour into a glass, every stage is engineered for purity and consistency.

*"Altitude Water's atmospheric generators convert humidity into purified drinking water, providing self-sufficient, decentralised solutions for homes, businesses and disaster response."*

### ALTITUDE WATER AND GOOD VIBRATIONS PARTNER TO DELIVER LIFE-CHANGING ATMOSPHERIC WATER AND FREQUENCY-INFUSED WELLNESS THROUGH AQUA MOTION™

Lauderdale Lakes, FL – Altitude Water, a leading Atmospheric Water Generator (AWG) manufacturer headquartered in South Florida known for their life-changing technology providing water access to global communities, has announced a new distribution partnership with Aqua Motion™, a division of 501(c)(3) non-profit Good Vibrations Music Co dedicated to providing frequency-infused wellness to in-need communities across the world.

“When we sponsored Good Vibration’s Aqua Motion™ Float Training last month, we

saw first-hand the true power their frequency technology had on those battling physical pain,” said Jeff Szur, Founder and COO of Altitude Water. “Now, our machines have the opportunity to be part of this amazing initiative, one that will provide healing and even education on a wider scale.”

Specializing in Frequency Infused Music® (FIM), Good Vibrations Music Co.’s Aqua Motion™ program combines uniquely-crafted therapeutic sounds with restorative movements and soothing warm water, a perfect holistic solution for over-stressed bodies and minds. As a distributor for Altitude Water, Aqua Motion™ will gain access to Altitude’s units, with the Trident-12 being able to produce 15 gallons of purified, drink-safe, and bacteria/impurity free water daily.
